EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Neil Jetter on May 12, 2006.

The application has been amended as follows:

In claim 13 line 3, replace "salt" with --salts--.

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Claim 1 and the claims dependent thereon have been allowed because claim 1 requires the solid state mixing of at least one metal nitrate salt and at least one reducing organic acid, which is not taught or suggested in WO 03/048047 A1 (or its English equivalent U. S. patent Application Publication US 2005/0095194 A1). Additionally, applicants' claim 1 requires the heating of the metal oxide precursor complex to a temperature of at least 200 °C but no more than 1200 °C, which is outside the 1500 to 1700 °C temperature range for the corresponding step set forth in paragraph no. 0027 in US 2005/0095194 A1 (the English equivalent of WO 03/048047 A1).

Applicants' claim 13 has been allowed because there is nothing in WO 03/048047 A1 teaching or suggesting the solid state mixing of two different metal nitrate salts and at least one reducing organic acid.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

DRAWINGS

The applicants' drawings filed on Apr. 27, 2006 have been approved by the examiner.

U. S. Patent Application Publication No. US 2005/0095194 A1, which is the English equivalent of WO 03/048047 A1, is made of record.
